

Connect Access Card for Interviewing

Interviewing: Principles and Practices, the most widely used text for the interviewing course, continues to reflect the growing sophistication with which interviewing is being approached, incorporating the ever-expanding body of research in all types of interview settings, recent communication theory, and the importance of equal opportunity laws on interviewing practices. It provides the most thorough treatment of the basics of interviewing, including the complex interpersonal communication process, types and uses of questions, and the structuring of interviews from opening to closing. Connect is the only integrated learning system that empowers students by continuously adapting to deliver precisely what they need, when they need it, and how they need it, so that your class time is more engaging and effective. It provides tools that make assessment easier, learning more engaging, and studying more efficient. For instance, Connect contains SmartBook, the first and only adaptive reading experience available for the higher education market. Powered by the intelligent and adaptive LearnSmart engine, SmartBook facilitates the reading process by identifying what content a student knows and doesn't know. As a student reads Interviewing: Principles and Practices, the material continuously adapts to ensure that he or she is focused on the content most crucial to closing specific knowledge gaps.
