DIPLOMAT SCIENCE AND ENGINEERING illustrates the underlying logic of English pronunciation. The pronunciation of approximately 87% of English vocabulary follows a precise, logical pattern. DIPLOMAT SCIENCE AND ENGINEERING clearly describes this logical pattern and analyses a simple series of fundamental rules that are constantly repeated throughout English vocabulary. This approach allows the learner to logically construct the pronunciation of English words in much the same way that problems are solved in Arithmetic and Algebra. DIPLOMAT SCIENCE AND ENGINEERING is extremely concise and succinct, and the essential principles of English pronunciation can be mastered in less than 8 hours of study. DIPLOMAT SCIENCE AND ENGINEERING is a specialist title in the DIPLOMAT PROFESSIONAL SERIES and serves as a reference book for non-native English professionals and students in the fields of science and engineering.
