

Experiences in Liberal Arts and Science Education from America, Europe, and Asia: A Dialogue across Continents

This book highlights the experiences of international leaders in liberal arts and science education from around the world as they discuss regional trends and models, with a specific focus on developments in and cooperation with China. Focusing on why this model responds to the twenty-first century requirements for excellence and relevance in undergraduate education, contributors examine if it can be implemented in different contexts and across academic cultures, structures, and traditions.
