

## Flip It On Its Ear: A Radical Approach to Public Speaking

Are you tired of walking away from situations thinking, I wish I would have said something. Flip It On Its Ear is designed to radically alter how we think about ourselves and public speaking. With over thirty years of teaching, writing, and speaking on the topic, Onlee Bowden is a public speaking instructor and corporate consultant who has taught thousands to communicate with confidence. Onlee brings mastery level understanding to how we learn and use public speaking in our daily lives. Included in the book is the Bowden Speaking Wheel, a radical way to organize and use your speaking notes. Intended to recalibrate the typical attitude toward public speaking, the goal of Flip It on Its Ear is to reduce fear and replace it with the belief that anyone can speak with more ease and effectiveness.
