

## From Where We Came: poems

Art Stewart's fifth volume of science-based poetry explores the latest findings on human origins. Reaching deep into compelling examples from human history, and the history of our natural world, Stewart delivers carefully crafted meditations that seamlessly braid fact, loss, longing, and imagination. Stewart's work is an important and intelligent contribution to bridging the ever-widening gap between the language of science and that used by everyday people when they explore their own origins—a must-read for those wishing to understand the origins of humankind from another, very human perspective. In *From Where We Came*, Stewart articulates in a novel and often surprisingly beautiful way what is often difficult for scientific writing, and in fact for scientists themselves, to communicate to the public—the wonder of the search for our origins and the visceral thrill that we as scientists receive as each discovery sheds another ray of light on humankind's origins. ~ Prof. Lee R. Berger FRSSAf ASSAf The many anastomosing threads of history form the backbone of Stewart's fifth volume of science-steeped poetry. Reaching deep into compelling examples from human history, and the history of our natural world, Stewart delivers carefully crafted meditations that seamlessly braid fact, loss, longing, and imagination. As Stewart notes, the reach of modern science is indeed vast, but it is certainly not devoid of wonder. The armchair time-traveller and lab-bench scientist alike will be richly rewarded by even a casual walk through Stewart's territory, giving yet more evidence of the growing isthmus between C.P. Snow's two cultures. ~ Nicholas D. Pyenson Curator, Smithsonian's National Museum of Natural History
