

## \$1,000 Start-Ups: 60 Businesses for Micro-Entrepreneurs ... and how to start them

If you're a Micro-Entrepreneur and want to start a new business this is the book for you: It tells you what you need to know to get started and it provides you the information to make the decision.

Spending less than \$1,000 to get a business started: lets you try out a business to see if it fits, gets you to rinse and repeat quickly, causes you to master every role in the business, limits your exposure while you see if it will work, and can be your path to financial independence. For each of the 60 businesses you learn: what specialized and general knowledge you need, how the business makes money, everything you need to know to set-up the business, how to market the business to find customers, what a Day in the Life of a business owner is like, start-up costs, monthly costs, sage Advice from business owners, and resources you can use to learn even more. You also get the tools you need to: write your business plan, legally establish your business, keep basic financial and tax records, and develop your marketing plan.
