

Rainbows For Rosie

This guidebook has been compiled to facilitate optimum speech and language development, especially during the pre-school years. As speech-language pathologists we have had the opportunity to observe and evaluate many children. We personally feel that children absorb speech and language skills readily from parents, teachers, relatives and friends. It is to these individuals that we address this guidebook. Our general goals are to: 1. Provide suggestions and activities for stimulating receptive and expressive language skills and articulation skills. 2. Present a developmental guideline for parents and teachers to use to determine if intervention is necessary. 3. Help the individual gain greater insight into his role in the communication process. 4. Enhance the educators awareness of the processes involved in learning communication skills.
